\$400,000 RECOVERY ON PRE-TRIAL SUBROGATION ACTION

The Forensic Engineering/Loss Control Group of Brosz and Associates is pleased to announce the successful settlement of a bus duct in a high-rise office tower in New York.

The newly installed aluminum bus duct in an office tower undergoing renovation suffered sustained electrical arcing and ensuing fire. The bus duct was improperly installed. Concrete slurries and contaminants entered the bus duct and caused it to short.

Brosz and Associates provided Forensic Engineering and Expert Services for the New York City law firm who were retained by the insurers.

The claim/loss was \$450,000.00, of which \$400,000.00 was recovered from the various contractors under a pre-trial settlement.
