FORENSIC ELECTRICAL ENGINEERING SUPPORT SERVICES FOR UTILITIES

Since 1970, Brosz and Associates, International Consulting Forensic Engineers, provides forensic electrical engineering support services for the legal and claims departments and for utilities and their insurers. Our staff of 17 includes former utility engineers and manufacturers with many years experience in utility maintenance and construction and operation. We have been involved in numerous cases involving electrocution and public contact with lines and equipment occurring during tree-trimming operations, objects on lines, unscheduled outages, contacts involving all manner of cranes and lifting devices, hot air balloons, overvoltages on customer equipment, harmonics problems and fires in commercial, industrial and residential, as well as incidents attributable to illegally accessed and vandalized utility property in vaults and substations. Our high voltage and high current lab is supported by over 1 million dollars of test equipment.

We offer for your perusal a sampling of the 4900+ cases we have opened including electrical and mechanical utility related accidents at our website www.brosz.net.
