FATAL ELECTROCUTION INVOLVING TREE TRIMMINGS

Brosz and Associates, International Consulting Forensic Engineers, is pleased to announce the successful conclusion of a civil lawsuit on behalf of an Electrical Utility company. The lawsuit was launched against the Utility by the estate of a workman who was electrocuted while trimming trees in the proximity of a 16 000 volt high voltage line on private property.

The ensuing fatal electrocution was investigated studied and simulated. A report was provided to the client, Defendant's law firm. The results of the work caused the Plaintiff to withdraw his case against the Utility Company.

There are many current cases, including a number of fire losses that we are working on in both Canada and the United States. Should you wish further information, please contact Brosz and Associates Forensic Engineering Group.
